

Removable Ground Spike Installation:

Using the Ground Spike: To attach the Ground Spike to the BenderStik, screw the stake into the base until snug. Be sure when positioning Benderstik with the ground spike that the ground is clear of obstructions, and that the turf is tough and deep enough to accommodate and retain the position of the spike.

Use caution when transporting the BenderStik: Always remove the ground spike when transporting the BenderStik. Always be sure that the ground spike is removed when not using the BenderStik. See Figure #5.

Fig. #5

CAUTION: GROUND SPIKE IS VERY SHARP!
