

BenderStik™ Assembly Instructions:

Step 1. Make sure all parts are included before assembly.

Feedback Rod (1)

Extension Pole (1)

Removable Ground Spike (1)

Fig. #1

Step 2. To extend the extension pole, twist the inner pole counter-clockwise until it moves freely. Extend to desired length. Twist the inner pole clockwise to lock the pole in place. See figure #2.

It may be necessary to assemble the extension pole. Simply slide the inner (aluminum color) pole into the outer (black color / wider) pole ensuring the plastic fittings go into the outer pole first.

Fig. #2

Fig. #3

Step 3. Connect the Feedback Rod and Extension Pole by screwing the ends together snugly. See figure #3.

Adjust the benderstick as needed to achieve desired results. See figure #4.
